DAY 7: QUERYING DATABASE CONTINUE

The GROUP BY clause is used to group together information in order to summarize related data.

```sql
/*Which continents had more countries on the list?*/
SELECT continent, COUNT(country_name) AS num_of_countries
FROM "Geography".countries
GROUP BY continent;

/*How many countries had their independence in 1960?*/
SELECT indep_year, COUNT(country_name) AS country_count
FROM "Geography".countries
WHERE indep_year = 1960
GROUP BY indep_year;
